

Compass® Tape Gateway

A high-performance, software-defined backup solution to modernize your existing infrastructure's tape libraries

FEATURES

Fully integrated CTG functionality within Compass data protection platform

Eliminate physical tape media, transport, and storage costs

Fully automated backup, restore, and disaster recovery of virtual tape libraries, drives, and tape

Emulates multi-platform, heterogeneous tape environments

Leverage multi-tier storage both on-premises and in the cloud

Intelligently scales locally and in the cloud

Incorporates AES 256 bit encryption and enhanced security

Seamlessly bridge disk and tape formats

iSCSI connectivity for flexibility on-premises and in-cloud

Multi-tenant CTG support

At Cobalt Iron, we understand the unique challenges faced by IBM i customers. Our Compass platform is designed to deliver a seamless, unified data protection experience, focusing on three critical pillars:

- **Simplicity:** Streamlined operations with intuitive management
- **Instant-On:** Rapid deployment minimizing time-to-value
- **SaaS Automation:** Fully automated workflows reducing administrative overhead

Tailored Solutions for IBM i

The Compass approach supports IBM i customers across diverse environments whether on-premises or Power Virtual Server (PowerVS) on IBM Cloud. Key offerings include:

Compass Tape Gateway

A versatile solution available both on IBM Cloud and on-premises within secure Compass Vaults. The Compass Tape Gateway enables efficient data protection while optimizing storage resources.

Compass Transitional Vaults

For IBM i workloads, the Compass Transitional Vaults provide a seamless path for hybrid data protection. Customers can back up their on-premises systems and restore them to IBM Cloud within PowerVS ensuring continuity and flexibility.

Operational Simplicity for IBM i

The Compass portable, SaaS-managed solutions empower IBM i customers to:

- Simplify backup and recovery operations
- Transition workloads effortlessly between on-premises and cloud environments
- Achieve reliable, scalable data protection with minimal effort

With Cobalt Iron Compass, IBM i customers gain more than a data protection platform—they gain a partner in operational efficiency and hybrid cloud innovation.

SMART.
SECURE.
AUTOMATED.
