

Compass® for IBM i Workloads

Simple and Secure IBM i Backup with Cobalt Iron Compass® Tape Gateway™

Differentiators for Power Virtual Server

- Cyber security
- Simplicity
- SaaS

Compass Tape Gateway Features:

- Complete VTL
- Library emulation
- Tape Drive emulation
- Dynamic volume sizing
- iSCSI connectivity
- IBM Cloud availability
- MSP-ready
- On-premises appliance
- Replication
- 2nd site, 2nd copy
- Encryption integrated
- Multi-tenant
- Multi-instance

What is Compass Tape Gateway™

Compass delivers automated, secure, and simple backup for IBM i systems — available on-premises or in the IBM Cloud. Compass CTG includes a comprehensive Virtual Tape Library (VTL) and is a solution built for operational efficiency and cyber resilience.

Who needs Compass

- Organizations running mission-critical IBM i workloads
- Enterprises looking to modernize or extend IBM i backup to the cloud
- Enterprises looking to migrate IBM i workloads to IBM PowerVS

Compass Eliminates Pain Points

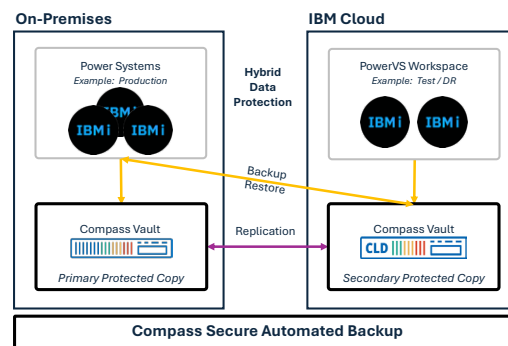

- Manual and complex VTL management, operations, and maintenance
- Lack of automation and cyber protection in legacy tools
- Multi-tool environments with multiple cyber attack complexities

Compass Cyber Security

- Included in every Compass deployment
- Security is never an add-on with Compass

Compass Cyber Security Features

- Zero Access® Architecture
- Immutability
- Automated Backup Updates and Operations

Example workload layout scenario across regions, zones, and data centers

SMART.
SECURE.
AUTOMATED.
